IMPORTANT:

- The health assessment and documentation must be completed by an Authorised Health Professional (medical practitioner) and signed and dated accordingly.
- In order to undertake the assessment effectively, the Authorised Health Professional must also have access to the previous health assessment record.
- The Record for Health Professional form is designed to guide a Periodic Health Assessment. It may also be used for a Triggered Health Assessment, acknowledging that the scope of that assessment is likely to focus on a particular concern or health issue.
- The form is set out according to the main health requirements for Category 1 and Category 2 Safety Critical Workers, with reference to the relevant sections of the Standard. It includes health screening requirements and areas to record the status of existing health conditions.
- It is not a checklist and not all fields will be relevant to all workers and all assessments. Please refer to the Standard for detailed assessment and review requirements. For example, the cardiac risk score should only be conducted for Category 1 Safety Critical Workers aged 30 years and over who don't have known cardiac disease or symptoms, and should only be repeated as defined in the Standard.
