

Attachment B – Survey questions used in consultation on review principles

The draft principles propose to more closely align the land mode specific provisions of the ADG Code with the ADR & RID, whilst still maintaining the current look and feel of placards, and segregation methodologies.

Q1. What do you see as the benefits of such alignment?

Q2. What do think will be the challenges to achieving this alignment?

Q3. What negative impacts do you see for Australia?

Alignment with ADR & RID would enable a means of maintaining all provisions of the ADG Code on a two-yearly cycle.

Q4. Do you see this as a good thing, why?

Q5. What alternatives do you believe are available for maintaining the mode specific (non UN Model Recommendations) provisions of the ADG Code?

The ADR & RID are maintained by UN working party WP15. WP 15 ensures harmonisation between the ADR & RID and ensures they are harmonised with the UN Model Recommendations.

Q6. What benefits do you see from Australia participating (as a non-voting) member of WP15?

Please summarise your overall thoughts on the draft Review Principles and Terms of Reference for this project.

Q7. Overall, what are your thought on the proposed principles?

Q8. What is your biggest concern with the proposed principles?

Q9. What opportunities do you see to improve safety and productivity for all Australians through this comprehensive review?
