20 November 2020

Dr Gillian Miles
Chief Executive Officer and Commissioner
National Transport Commission
Level 3, 600 Bourke Street
MELBOURNE VIC 3000

Dear Dr Miles

Toowoomba Regional Council Submission – Heavy Vehicle National Law Review

Thank you for the opportunity to provide feedback on the consultation regulation impact statement as part of the Heavy Vehicle National Law (HVNL) review.

In 2017, Toowoomba Regional Council, in conjunction with Western Downs Regional Council endorsed a framework under which Council would 'pre-approve' the issue of a permit for the movement of wide agricultural vehicles on Council-controlled roads within its boundaries, in appropriate circumstances.

Extensive work has been undertaken with industry and regulatory representatives in relation to this 'pre-approval' framework for the movement of over-dimension agricultural vehicles as shown in our submission.

It is our view that our 'pre-approval' framework is essential to enable and support the economic development of the region through enhancing the efficiency of agricultural over-dimension vehicle movements, while managing the safety and other impacts on rural road users.

To date, both Councils have had significant difficulty in engaging Queensland Police Service (QPS), as a fellow road manager authority, to obtain their approval which would allow the proposed pre-approval framework to be brought into practical effect.

Without QPS consent, all wide agricultural vehicle movement applications would still need to be forwarded to them for individual consideration, which basically defeats the purpose of the pre-approval framework which is to encourage applications to be made to the NHVR, by streamlining the approval process and giving certainty regarding the conditions that would be attached to these approvals.

Presently very few applications are being made for wide agricultural vehicle movements, and the concern is, that this is contrary to what is actually happening on the roads in our agricultural areas.

It is our understanding that Queensland is the only state in which Police are recognised as a road manager authority, and that the Police do not have this recognition in other states across Australia.

We would like to make the Commission aware of this situation, requesting that this matter be included in the HVNL Review for your consideration.

If you have any queries in relation to this submission, please contact Mr Rod Betts, Manager – Transport and Drainage Planning on 07 4688 6405.

Yours sincerely

A handwritten signature in black ink, appearing to read 'M Brady', with a comma at the end.

Att. Toowoomba Regional Council Submission to HVNL Review – Infrastructure Committee 10 October 2017, Item 02 – Proposed Pre-Approval Framework for Over-Dimension Agricultural Vehicle Movements

Item No.	02
REPORT TITLE	Proposed Pre-Approval Framework for Over-Dimension Agricultural Vehicle Movements
AUTHOR	Principal Engineer - Transport Planning (David Hood)

PURPOSE OF REPORT

To seek Council's endorsement of a framework under which Council could 'pre-approve' the issue of a permit for the movement of wide agricultural vehicles on Council-controlled roads, in appropriate circumstances.

EXECUTIVE SUMMARY

At its Ordinary Meeting on 17 November 2015 (Infrastructure Committee - 10 November 2015 - Item 01), Council endorsed a number of initiatives to facilitate more efficient agricultural and transport logistics outcomes within and beyond the Toowoomba and Western Downs Regional Council (WDRC) local government areas. One of these initiatives was the establishment of an Agricultural Transport and Logistics Working Group to investigate a range of short, medium and longer-term measures arising from the Agricultural Freight Industry Workshop held on 2 October 2015. The Group was established and its inaugural meeting was held on 9 March 2016.

Since that time, Council has implemented the endorsed short-term initiatives for heavy vehicle logistics, by extending the operating hours and permit durations and standardising speed limits for multi-combination vehicles permits issued within the Toowoomba Region. WDRC have also implemented similar initiatives.

In relation to agricultural transport, this report seeks Council endorsement of a framework, recommended by the Agricultural Transport and Logistics Working Group Meeting of 28 August 2017, for Council to 'pre-approve' the granting of permits for the movement of over-dimension agricultural vehicles in appropriate circumstances, including the 'pre-approval' conditions and the proposed administrative arrangements around issuing permits of this type.

RECOMMENDATION

That the Chief Executive Officer be authorised to negotiate, finalise and implement the proposed framework as outlined in the report included in Attachment 2 'Proposed Pre-Approval Conditions for Over-Dimension Agricultural Vehicles Using the Local Government Controlled Road Network - September 2017 (Toowoomba Regional Council),' to come into effect on 1 February 2018.

REASONS FOR RECOMMENDATION

To enable and support the economic development of the region through enhancing the efficiency of agricultural over-dimension vehicle movements, while managing the safety and other impacts on rural road users.

COMMITTEE RECOMMENDATION

That the Chief Executive Officer be authorised to negotiate, finalise and implement the proposed framework as outlined in the report included in Attachment 2 'Proposed Pre-Approval Conditions for Over-Dimension Agricultural Vehicles Using the Local Government Controlled Road Network - September 2017 (Toowoomba Regional Council),' to come into effect on 1 February 2018.

**COUNCIL DECISION - 17 October 2017
(Infrastructure Committee - 10 October 2017 - Item No. 02)**

Committee Recommendation adopted by Council at its Ordinary Meeting of 17 October 2017.

ACTION TO BE TAKEN

Item No.	Action Officer	Action
02	David Hood	Please instigate all follow up action from Council's decision.

CORPORATE PLAN REFERENCE

- 5.1.2 - Ensure the provision and management of infrastructure and assets meet the needs and priorities of Council, the community and industry.
- 5.1.4 - Plan and deliver a safe, sustainable and efficient road network.
- 7.2.1 - Continually review and enhance service delivery to ensure Council's responsiveness to customer and community expectations.
- 7.2.2 - Work collaboratively across Council to provide effective, efficient and coordinated outcomes.

BACKGROUND

At its Ordinary Meeting on 17 November 2015 (Infrastructure Committee - 10 November 2015 - Item 01), Council endorsed a number of initiatives to facilitate more efficient agricultural and transport logistics outcomes within and beyond the Toowoomba and Western Downs Regional Council local government areas. A copy of the report presented to Council in November 2015 is Attachment 1.

One of the initiatives was to establish an Agricultural Transport and Logistics Working Group to investigate a range of short, medium and longer-term measures arising from the Agricultural Freight Industry Workshop held on 2 October 2015. The Group was established and its inaugural meeting was held on 9 March 2016.

Extensive work has been undertaken with industry and regulatory representatives in relation to a pre-approval framework for the movement of over-dimension agricultural vehicles.

Further detailed background and proposed operational conditions are included in Attachment 2, which presents a recommended approval mechanism and proposes 'pre-approval conditions' for the granting of permits under section 4.2.4 of the 'Guidelines for Excess Dimension' Agricultural Vehicles and Agricultural Combinations - Form 14, Version 4, October 2013 for Minor Roads, that are maintained roads falling under the jurisdiction of Toowoomba Regional Council or WDRC.

CONSULTATION UNDERTAKEN

This proposal has been the joint work of relevant members of the Agricultural Transport and Logistics Working Group. As such it represents a general consensus of all parties associated with the movement of over-dimension agricultural vehicles, and at the Working Group Meeting of 28 August 2017, the proposed framework was recommended for endorsement by both Toowoomba Regional Council and Western Downs Regional Council.

An Information Session on this matter was held with Councillors on 3 October 2017.

ISSUES, RISKS AND RESPONSES

The current Department of Transport and Main Roads' Form 14 does not cover the movement of agricultural vehicles wider than 5m on either the declared or local government road networks. Due to the uncertainty and timeframes associated with permit approvals, it is thought that numbers of movements wider than 5m could be occurring without permits being sought. This is of concern to industry, regulators and road authorities alike.

One of the main drivers behind the development of this framework is to encourage users to apply for permits wider than covered under Form 14, with clarity and certainty as to what conditions would be applied to those permits.

There are no recorded incidents on Council's road network involving over-dimension agricultural vehicles.

FINANCIAL / RESOURCE IMPLICATIONS

There are minimal financial and resource implications associated with implementing the recommendations contained within this report. The number of permit applications for over-dimension agricultural vehicles is currently very small. Under the pre-approval framework, there would continue to be minimal administrative effort on behalf of Council in relation to issuing permits, apart from periodic review of the framework itself.

CONCLUSION

The recommendations contained in this report would deliver one of the significant medium-term objectives of Council's decision of November 2015 for the agricultural sector.

Work on the remaining medium and longer-term objectives is continuing.

ATTACHMENTS

- Attachment 1 of 2 [Council report 'Outcomes from the Agriculture Freight Industry Workshop', November 2015](#)

*Proposed pre-approval framework for over-dimension agricultural vehicle movements on the local government controlled road network – September 2017
(Toowoomba Regional Council)*

Executive Summary

This report presents a recommended approval mechanism and proposes 'pre-approval conditions' for the granting of permits under section 4.2.4 of the 'Guidelines for Excess Dimension' Agricultural Vehicles and Agricultural Combinations – Form 14, Version 4, October 2013 for Minor Roads that are maintained roads falling under the jurisdiction of Toowoomba Regional Council or Western Downs Regional Council.

Purpose

The purpose of this document is to record:

- (a) issues raised by members of the agricultural Transport and Logistics Working Group through its deliberations; and
- (b) the proposed solutions tabled at the August 2017 meeting of the Group (as modified following discussion at the meeting about the proposed pre-approval conditions for access to the minor road network for agricultural vehicles wider than 5.0 metres).

Background

Currently, agricultural vehicles that do not comply with the *Transport Operations (Road Use Management - Mass, Dimensions and Loading) Regulation 2005*, Part 3, may be able to access the road network in Queensland through a method of alternative compliance known as the 'Guideline for Excess Dimension, Agricultural Vehicles and Agricultural Combinations, Vehicles and Drivers, Form 14 V4 Transport and Main Roads, October 2013' (Form 14).

Form 14 specifies access conditions for agricultural vehicles up to 5.0 metres wide for the purpose of crossing or travelling along a road. Where an agricultural vehicle exceeds the maximum dimension limits specified in Form 14, movement may be effected where an alternative authority approval is obtained.

The Agricultural Transport and Logistics Working Group received representation from several peak bodies, including Cotton Australia and AgForce, to assist with the efficient and effective farm operations of agricultural vehicles needing to use a road to access farm holdings.

Figure 1 John Deere CP690

Cotton Australia presented details of the widths of Round Bale Cotton Pickers. The John Deere 7760 and John Deere CP/CS 690 Pickers are predominating in the industry.

These vehicles can currently move on the State-controlled Road network through Individual Mass and Dimension Exemption Notices with some controls prohibiting the use of some road structures such as culverts or particular bridges. Industry bodies have sought a width of operation up to 6.1 metres on the local road network.

Proposed pre-approval framework for over-dimension agricultural vehicle movements on the local government controlled road network – September 2017 (Toowoomba Regional Council)

AgForce presented details showing that, as engine horsepower in agricultural vehicles has increased, the ability of these vehicles to utilise wider equipment in farming applications has also increased. A combination of farm-modified and new, imported equipment has created a need to move machinery up to 10 metres wide across and along the road network.

Figure 2 Example of farm-modified equipment

Representation acknowledged that a small number of individual applications have been made to both the Department of Transport and Main Roads and local government. Whilst most of these applications have been approved, the process of application and assessment is time-consuming and not well understood. As such, a high level of non-compliance is reported.

Two issues have been examined by a working group represented by TRC, WDRC, TMR, Cotton Australia and AgForce. These issues have been summarised as:

1. The width of vehicle and operational conditions; and
2. The method of making application for alternative authority approval.

Vehicle widths and proposed operational conditions

The proposed operational conditions would apply to agricultural vehicles traveling within the zones as defined in Form 14 version 4 October 2013 Agricultural Vehicles and Agricultural Combination - Vehicles and Drivers - Zone 2 with widths greater than 5.0 metres up to a maximum width of 9.0 metres.

References to “**zone 1, zone 2 and zone 3**” are references to those areas indicated in the Zonal Map located in ‘Maps: Multi-combination routes and zones in Queensland’ on the Department of Transport and Main Roads website www.tmr.qld.gov.au > Business and Industry > Heavy Vehicles > Multi-combination vehicles > Maps.

Figure 3 Zonal reference from Form 14

The permit would apply to ‘day-time’ travel only.

The permit would apply only to the minor roads as defined under Form 14 within the Areas shown in the maps in Appendix A and applicable roads as listed in Appendix B. These roads are categorised as either “Significant Council Roads” or “Local Government Roads”.

Proposed pre-approval framework for over-dimension agricultural vehicle movements on the local government controlled road network – September 2017
(Toowoomba Regional Council)

The proposed 'pilot' and 'escort' conditions for each category are detailed in Table 1.

Table 1: Agricultural Pilot and Escort Requirements – Agricultural Vehicles or combinations – Toowoomba Regional Council and Western Downs Regional Council Roads			
Road Category	Type of trip	Width of Agricultural Vehicle or Combination	
		Over 5.0 m but not exceeding 7.0 metres	Over 7.0 metres but not exceeding 9.0 meter
Significant Council Roads as named in the attached list (Appendix B).	Long Trip > 3km in total length	2 Ag Pilots	Subject to Individual Permit Application
	Short Trip <3km in total length	1 Ag Pilots	2 Ag Pilots
	Crossing a road by a direct path	Nil	Nil
Local Council Roads as named in the attached list (Appendix B).	Long Trip > 3km in total length	2 Ag Pilots	Subject to Individual Permit Application
	Short Trip <3km in total length	1 Ag Pilot	1 Ag Pilot
	Crossing a road by a direct path	Nil	Nil

The proposed conditions for agricultural vehicles crossing a stated road under the proposed permit mechanism would be those defined in Form 14, Section 4.4 *Conditions for crossing any critical road or road in critical area* (refer to Figure 5 below).

*Proposed pre-approval framework for over-dimension agricultural vehicle movements
on the local government controlled road network – September 2017
(Toowoomba Regional Council)*

4.4 Conditions for Crossing Any Critical Road or Road in a Critical Area

4.4.1 The driver of the oversize agricultural vehicle or combination crossing any critical road or road in a critical area must ensure the route being used to cross the road is suitable and safe for the oversize agricultural vehicle or combination.

4.4.2 The driver of the oversize agricultural vehicle or combination must ensure the following conditions are met prior to attempting to cross any critical road or a road in a critical area.

- If the driver has clear vision of at least 350 metres along the road from the normal driver's position in both directions there is no requirement for an agricultural pilot or escort to assist the driver of the oversize agricultural vehicle or combination to cross the road.
- If the driver has clear vision of at least 350 metres along the road from the normal driving position in one direction only but there is at least 100 metres clear vision along the road in the other direction, the oversize agricultural vehicle or combination must be assisted by at least one agricultural pilot while crossing the road. The agricultural pilot must be positioned on the side with the least vision and in a manner prescribed in subclause 12.1.1.
- If the driver does not have clear vision of at least 350 metres along the road in both directions but there is at least 100 metres clear vision along the road in directions, the oversize agricultural vehicle or combination must be assisted by at least two agricultural pilots. One agricultural pilot must be positioned on each side of the oversize agricultural vehicle or combination crossing the road in a manner prescribed in subclause 12.1.1.
- If the driver does not have clear vision of at least 100 metres along the road in both directions an alternative route to cross the road with the required sight distances must be used.

Figure 4 extract from Form 14 page 12

The proposed pre-approval conditions would not apply to any roads within the Toowoomba Regional Council or Western Downs Regional Council areas that are State-controlled Roads i.e. owned and controlled by the Department of Transport and Main Roads.

The pre-approval conditions would not apply to any road within the Toowoomba Regional Council or Western Downs Regional Council area that is not maintained by either Toowoomba Regional Council or Western Downs Regional Council.

All other conditions listed in Form 14 would prevail.

*Proposed pre-approval framework for over-dimension agricultural vehicle movements on the local government controlled road network – September 2017
(Toowoomba Regional Council)*

Method of making application for alternative authority approval

Currently, applications for alternative authority consent are made directly to the Department of Transport and Main Roads. Individual requests for access to the council-controlled network are referred to Council by the Department of Transport and Main Roads for consent.

 - B-double permit
 - Class 3 (Miscellaneous) permit
 - Controlled Access Bus 12.5m-14.5m permit

Home > Road access > Access management > Applications and forms > **Agricultural vehicle permit**

Agricultural vehicle permit

Do I need an agricultural vehicle permit?

You will need to apply for a class 1 agricultural vehicle permit if your agricultural vehicle does not comply with mass, dimension or operating requirements set out in a gazette notice.

- ▶ See [Gazette notices - agricultural vehicles access](#)

To apply for an agricultural vehicle permit:

- ▶ **for travel within ACT/Tas/Vic**—apply to the NHVR.
- ▶ **for travel within NSW**—apply to the NHVR or apply to [Roads and Maritime Services](#) for state-controlled roads and to [individual councils](#) for local government roads.
- ▶ **for travel within Qld/SA**—apply directly to the [relevant state or territory road transport authority](#).
- ▶ **for cross-border travel**—apply to the NHVR. **Note:** The NHVR processes all cross-border applications except for travel within the Northern Territory and Western Australia. For these jurisdictions, apply directly to the [relevant state or territory road transport authority](#).

The National Heavy Vehicle Regulator (NHVR) is currently undertaking a harmonisation process to establish an Australia-wide agricultural vehicle access process to replace the Form 14.

Whilst vehicles wider than 5.0 metres will still be outside the widths being considered by the harmonisation process, the method of application through NHVR was assessed as beneficial to the proposed pre-approval process.

Consequently, it is proposed that the Council-endorsed pre-approval conditions be lodged with the NHVR and used for the purpose of issuing permits, as 'pre-approved' conditions.

*Proposed pre-approval framework for over-dimension agricultural vehicle movements on the local government controlled road network – September 2017
(Toowoomba Regional Council)*

The proposed pre-approval conditions would allow NHVR to approve applications on behalf of Council. Applications, or any part of any application, that does not [something] thereof, outside the pre-approval conditions will be referred to the relevant authority for approval. This process would require agreement between the NHVR, TRC, WDRC and DTMR (Darling Downs) to be established prior to the harmonisation project being implemented.

Subject to this agreement being reached, preapproval is proposed to take effect on 1 February 2018, and be subject to review for continuation by 1 February 2019, or earlier, if circumstances of concern arise from any parties.

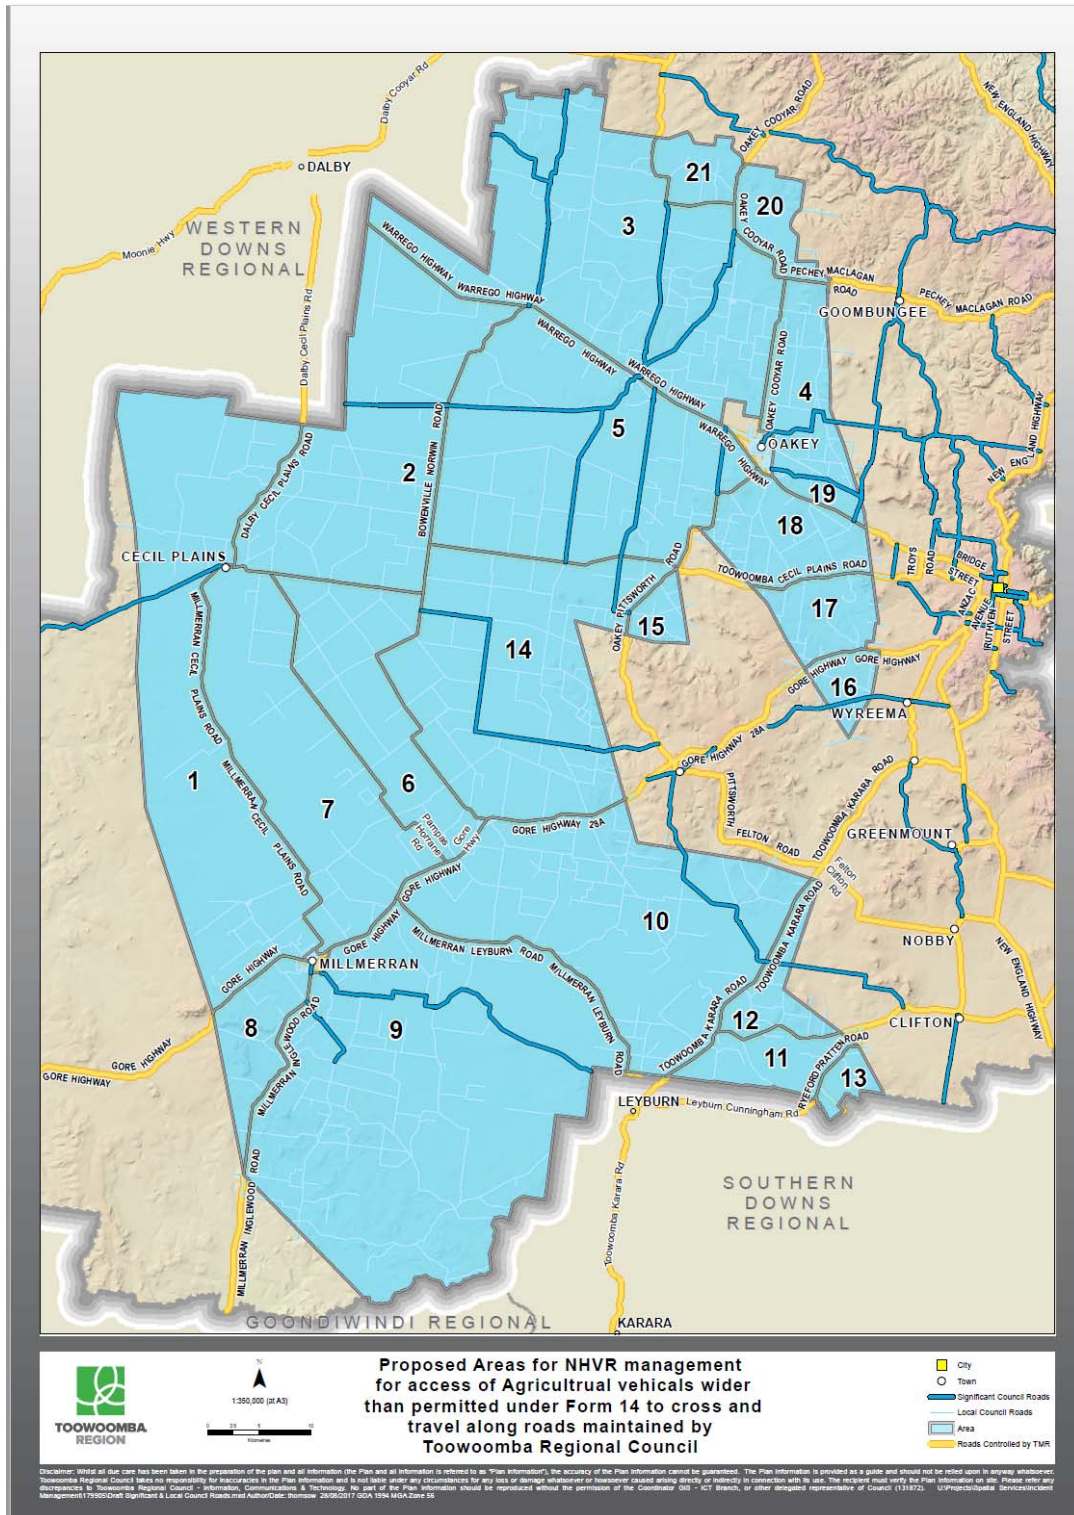

Framework Evaluation

The success of the proposed pre-approval framework would be measured as outlined in the table below.

Key Result Area	Performance Measure	Target
Safety	Public Safety Complaints	No Increase
	Reported Crashes	No Increase
	Reported Non-Compliance	No Increase
Efficiency	Permits Issued	Increased Number
Effectiveness	Survey to establish the benefit of the pre-approval process as reported by peak bodies.	Positive Outcomes
Learnings	Process Improvements	Efficient processes.
